

Curriculum Vitae (CV)

Dagmar Wobken, Dr. rer. nat.

University of Vienna

Division of Microbial Ecology

Department of Microbiology and Ecosystem Science

Research network 'chemistry meets biology'

Althanstrasse 14, 1090 Wien, Austria

Webpage: <http://www.microbial-ecology.net/people/dagmar-wobken>

Research interest

- Active microbial participants in key processes within the N- and C- cycle
- N₂ fixation process, diversity and ecology of diazotrophic microorganisms in diverse terrestrial habitats, free-living as well as plant-associated
- Microbial-mediated cellulose degradation
- Dormancy and resuscitation dynamics in terrestrial environments
- Ecophysiology of acidobacteria
- Development of molecular and isotope-labeling methods for studying uncultivated microorganisms in terrestrial habitats

The goal of the work in my research group is to better understand the active microbial participants in key processes within the C- and N- cycle and to identify the factors that govern these activities in terrestrial ecosystems. Many of our investigations go beyond the identification of these controlling factors and the responsive groups, and explore the interdependence of the C- and N- cycles along with the trophic interactions among microorganisms but also between plants and microorganisms. With this we aim to gain a holistic view on the function of the "soil microbiome". To do so, we combine ecosystem-level biogeochemical methods with molecular techniques (such as functional gene sequencing), stable isotope probing and single-cell approaches (such as Fluorescence *in situ* hybridization, NanoSIMS analysis and Raman microspectroscopy) across relevant spatial scales. To that end, my group is constantly developing and testing methods for single-cell investigations in terrestrial ecosystems. Furthermore, we strive to integrate the concepts of ecological theory into the realm of microbial ecology to address fundamental questions about niche differentiation, dormancy and microbial seed bank for fundamental processes in the soil C- and N- cycles.

Scientific experience

- | | |
|-----------------|--|
| Since Jan. 2018 | Assistant Professor , Division of Microbial Ecology, Department of Microbiology and Ecosystem Science, Research Network 'Chemistry meets Biology' University of Vienna, Austria |
| 2012 to 2017 | Group Leader , Division of Microbial Ecology, Department of Microbiology and Ecosystem Science, University of Vienna, Austria |
| 2008 to 2011 | Postdoctoral fellow , Department of Civil and Environmental Engineering, Stanford University/Exobiology Branch, NASA Ames Research Center/Lawrence Livermore National Laboratory (LLNL), USA. PIs: Prof. Alfred Spormann (Stanford University) & Dr. Peter Weber (LLNL) |
| 2007 and 2008 | Teaching assistant , Microbial Diversity Course, Marine Biological Laboratory (MBL), Woods Hole, USA. Directors: Prof. Thomas M. Schmidt & Prof. William Metcalf |

- 2007 to 2008 **Postdoctoral fellow**, Nutrient Group, Max Planck Institute for Marine Microbiology, Bremen, Germany. PI: Dr. Marcel Kuypers
- 2004 to 2007 **PhD student**, Department for Molecular Ecology, Max Planck Institute for Marine Microbiology, Germany. Advisers: Prof. Rudolf Amann & Dr. Bernhard Fuchs

Education

- May 2007 **Dr. rer. nat.**, Department for Molecular Ecology, Max Planck Institute for Marine Microbiology/University of Bremen, Bremen, Germany
Dissertation: "Diversity and *in situ* abundances of Planctomycetes in marine ecosystems" (Adviser: Prof. Rudolf Amann, finished with magna cum laude)
- Summer 2006 **Student**, Microbial Diversity Course, Marine Biological Laboratory (MBL), Woods Hole, USA
- 2004 - 2007 **PhD student**, Department for Molecular Ecology, Max Planck Institute for Marine Microbiology/University of Bremen, Bremen, Germany
- Nov. 2003 **Diploma in Biology**, Leibniz University Hannover, Hannover, Germany
Diploma thesis: Department for Molecular Ecology, Max Planck Institute for Marine Microbiology, Bremen, Germany (finished with grade 1, equivalent to grade A)
- 2000 to 2001 **Exchange student**, Northeastern University, Boston, MA, USA
Focus: Environmental microbiology (Laboratory of Prof. Slava Epstein)
- 1997 -2003 **Graduate studies** in biology at Leibniz University Hannover, Hannover, Germany
- Sept. 1999 **Pre-Diploma of Biology**, Leibniz University Hannover, Hannover, Germany (finished with grade 1, equivalent to grade A)
- 1997 - 1999 **Undergraduate studies** in biology, Leibniz University Hannover, Hannover, Germany

Academic prizes and awards

- 2016 **Science Award of the City of Vienna** for scientists <40 years of age ("Förderungspreis Stadt Wien")
- 2015 Member of the **Young Academy of the Austrian Academy of Sciences (ÖAW)**.
- 2014 **European Research Council (ERC) Starting Grant: *DormantMicrobes***.
- 2014 **Focus of Excellence Award**, Faculty of Life Sciences, University of Vienna, Vienna, Austria.
- 2012 **Marie Curie - Career Integration grant (CIG): *Understanding functional drivers in two terrestrial key processes- N₂ fixation and cellulose degradation- by a single cell approach***.
- 2010 **German Research Foundation (DFG) Research fellowship: *Identifying N₂-fixing microorganisms in photosynthetic microbial mats by Stable Isotope Probing (SIP) and nanometer-scale Secondary Ion Mass Spectrometry (nanoSIMS)***.
- 2000 **Graduate Student Fellowship**, Northeastern University, Boston, MA, USA.

Awards and Fellowships of Lab Members

- 2016-2018 Maximilian Nepel: Doctoral fellowship, Austrian Academy of Sciences (ÖAW)
- 2015 Raphael Gabriel: Scholarship from the Austrian Marshall Plan Foundation
- 2014-2016 Hannes Schmidt: Marie Curie Intra-European Fellowship (IEF), Marie Curie FP7 (EU)

2012-2014 Stephanie A. Eichorst: Marie Curie International Incoming Fellowship (IIF), Marie Curie FP7 (EU)

Peer-reviewed third-party funding

- **ERC Starting Grant:** *DormantMicrobes*. Funded by the European Research Council (ERC), project No. StG_2014_636928 (1.49 Mio €), (Lead-PI), 2015-2020
- **Doctorate Program:** *Microbial nitrogen cycling – From single cells to ecosystems*. Funded by the “FWF – Der Wissenschaftsfonds” (Austrian Science Fund), project No. W 1257-B20 (207,049 € of a total amount of 2.34 Mio €), (co-PI), 2016-2019
- **Project grant:** *Investigating the function of the ubiquitous Acidobacteria in terrestrial environments*. Funded by the “FWF – Der Wissenschaftsfonds” (Austrian Science Fund), project No. P 26392-B20 (435,698 €) (Lead-PI), 2014-2017
- **Project grant:** *Understanding the micro-environments of diazotrophs and their associated activities in rice*. Marie Curie Intra-European Fellowship (IEF), fellow Dr. Hannes Schmidt. Funded by Marie Curie FP7 (EU), project No. 628361 (179,137 €) (Lead-PI), 2014-2016
- **Project grant:** *A functional approach to understand active non-symbiotic diazotrophs in soil*. Funded by the “FWF – Der Wissenschaftsfonds” (Austrian Science Fund), project No. P 25700-B20 (448,751 €) (Lead-PI), 2013-2016
- **Project grant:** *Understanding functional drivers in two terrestrial key processes- N₂ fixation and cellulose degradation- by a single cell approach*. Marie Curie Carrier Integration Grant (CIG), fellow Dr. Dagmar Woebken. Funded by Marie Curie FP7 (EU), project No. 321742 (100,000 €), 2012-2016
- **Project grant:** *NanoSIMS enabled approach to understand bacterial and fungal cellulose degraders in soils*. Marie Curie International Incoming Fellowship (IIF), fellow Dr. Stephanie A. Eichorst. Funded by Marie Curie FP7 (EU), project No. 300807 (180,191 €) (co-host), 2012-2014
- **Research fellowship:** *Identifying N₂-fixing microorganisms in photosynthetic microbial mats by Stable Isotope Probing (SIP) and nanometer-scale Secondary Ion Mass Spectrometry (nanoSIMS)*. Fellow Dr. Dagmar Woebken. Funded by German Research Foundation (DFG), project No. WO 1678/1-1 (61,000 €), 2010-2011

Teaching activities at the University of Vienna, Austria

since 2016	Laboratory course “ <i>Scientific Practice in Molecular Microbiology and Microbial Ecology</i> ”, UE 300582
2016	Co-teaching of lecture series “ <i>Microbial Nitrogen Cycling: From single cells to ecosystems</i> ”, VO 300291
since 2014	Lecture series “ <i>Selected aspects of bacterial physiology</i> ”, VO 300131
since 2014	Practical Course „ <i>Molecular Microbiology, Microbial Ecology and Immunobiology - Diversity and function of uncultured microbes in medical and environmental samples</i> “, UE 300484
since 2013	Proseminar „ <i>Microbial Ecology</i> “, PS 300487
since 2013	Lecture series “ <i>Microbial communities</i> ”, VO 300178
since 2013	Workshop “ <i>International FISH Course</i> ”, offered to the international scientific community

Other scientific activities

- Ad-hoc reviewer:** Science, Nature Ecology & Evolution, Nature Communications, The ISME Journal, Molecular Biology and Evolution, Environmental Microbiology and Environmental Microbiology Reports, Applied and Environmental Microbiology, Microbial Ecology, PLOS One, Systematic and Applied Microbiology, Netherlands national research council “*Netherlands Organisation for Scientific Research (NWO)*”, Council for the Earth and Life Sciences
- Associate editor:** Frontiers - Terrestrial Microbiology and Frontiers - Systems Microbiology (2013 to 2016)

Invited presentations

- 2018 (upcoming) ASM 2018, Atlanta, Georgia USA. *Analysis of Rhizosphere Communities Using NanoSIMS*
- 2018 (upcoming) 8th International NanoSIMS User Meeting, Universität Bremen, Germany. *Exploring microbial participants in the C and N cycle in terrestrial environments by NanoSIMS.*
- 2018 University of Costa Rica, CIEMIC. *Combining stable isotope labeling experiments and single-cell techniques to elucidate the function of microorganisms in the environment.*
- 2017 Leibniz Institute DSMZ-German Collection of Microorganisms and Cell Cultures, Braunschweig, Germany. *Applying stable isotope labeling experiments, massive parallel sequencing and single-cell analysis to elucidate the function of microorganisms in soil.*
- 2017 Symposium “25th Anniversary of the Max Planck Institute for Marine Microbiology”, Bremen, Germany. *Revealing the active participants of N₂ fixation in photosynthetic microbial mats.*
- 2017 7th European Conference on Prokaryotic and Fungal Genomics (ProkaGENOMICS 2017), Göttingen, Germany. *Applying stable isotope labeling experiments, massive parallel sequencing and single-cell analysis to elucidate the function of microorganisms in soil.*
- 2017 Max Planck Institute for Chemistry, Mainz, Germany. *Combining stable isotopes, molecular and single-cell methods to elucidate the function of microorganisms in photosynthetic mats.*
- 2016 International Symposium on Microbial Ecology (ISME 16), Montreal, Canada. *Revealing the active participants of N₂ fixation in photosynthetic microbial mats.*
- 2016 74th Annual Swiss Society for Microbiology Meeting, Bern, Switzerland. *Combining stable isotope labeling experiments and single-cell analysis to elucidate the function of microorganisms in soil.*
- 2014 International workshop “NanoSIMS in biogeochemistry from soils to sediments, from geology to microbiology”, Chair of Soil Science, TU München, Freising-Weihenstephan, Germany. *Application of NanoSIMS to investigate the function of microorganisms in benthic and terrestrial ecosystems.*
- 2014 Gordon Conference Environmental Sciences - Water, Holderness, USA. *Investigating the function of uncultivated microorganisms using stable isotopes and molecular tools – from the process-level to single cells.*
- 2013 EMBO Conference on Aquatic Microbial Ecology: SAME13, Stresa, Italy (Keynote lecture). *N₂ fixation in coastal microbial mats: From the process level to single cells.*
- 2013 International workshop “FISH: Fundamentals and Applications”, University of Porto (FEUP), Portugal. *New developments on FISH – linking identity with function.*

- 2012 Institute of Ecology, University of Innsbruck, Austria. *Identifying the active diazotrophs in coastal microbial mats by a functional single-cell approach.*
- 2011 Department of Microbial Ecology, Vienna, Austria. *Identification of a previously unknown cyanobacterial group as active diazotrophs in coastal microbial mats using NanoSIMS analysis*
- 2008 Microbial Diversity Course, Marine Biological Laboratory (MBL), Woods Hole, USA. Directors: Prof. Thomas M. Schmidt & Prof. William Metcalf. *Investigations of marine anammox bacteria – their diversity, occurrence and genomic features*
- 2007 Environmental Science & Engineering, California Institute of Technology (CalTech), USA. *Diversity and ecology of marine Planctomycetes with focus on anammox bacteria*
- 2007 Department of Civil & Environmental Engineering, Stanford University, USA. *Investigating Planctomycetes in marine oxygen minimum zones using molecular methods.*
- 2007 Department of Microbiology, Oregon State University, USA. *Genomic investigations of Planctomycetes in marine oxygen minimum zones.*
- 2007 Department of Microbiology & Immunology, University of British Columbia, Canada. *Microdiversity of marine anammox bacteria in oxygen minimum zones.*

Contributions to international conferences (only first, presenting or last author contributions listed)

Eichorst SA, Trojan D, Giguere A, Roux S, Herbold C, Rattei T, **Woebken D.** 2018 (upcoming). Exploring the ecophysiology of acidobacteria and identifying the potential strategies for their success in soil. ASM 2018, Atlanta, Georgia, USA, poster presentation.

Imminger S, Strasser F, Schintlmeister A, Angel R, Eichorst SA, **Woebken D.** 2017. Single-cell level activity measurements in terrestrial ecosystems: combining stable isotope probing with Raman microspectroscopy and NanoSIMS. How dead is dead? 5th conference on exploring the edge of bacterial life. Vienna, Austria.

Angel R, Imminger S, Schintlmeister A, Eichorst SA, **Woebken D.** 2017. Contribution of heterotrophs to nitrogen fixation in cyanobacteria-dominated arid biological soil crusts. BAGEGO14: 14th symposium on bacterial genetics and ecology. Aberdeen, United Kingdom.

Woebken D. 2016. *Revealing the active participants of N₂ fixation in photosynthetic microbial mats.* International Symposium on Microbial Ecology (ISME 16), Montreal, Canada, invited speaker.

Eichorst SA, Strasser F, Schintlmeister A, Richter A, **Woebken D.** 2016. *Exploring the niches of cellulose degradation in a forested soil – from the process to the single-cell scale.* International Symposium on Microbial Ecology (ISME 16), Montreal, Canada, oral presentation.

Angel R, Gabriel R, Eichorst SA, **Woebken D.** 2015. *An optimised toolbox for investigating free-living diazotrophs in soil: from bulk measurements to single-cell analysis.* International Symposium on Microbial Ecology (ISME 16), Montreal, Canada, poster presentation.
