

The Doctoral School in Microbiology and Environmental Sciences offers **15 fully funded PhD positions** in diverse research areas ranging from **molecular microbiology, ecology, computational and evolutionary biology** to **environmental geosciences**. Our focus is to provide young scientist with a stimulating environment that promotes the development and advancement of essential skills for a prosperous academic career.

Would you like to:

- Join a dynamic and international research environment?
- Have access to unique high-level infrastructure and instrumentation?
- Receive interdisciplinary training at the interface of microbiology, ecology, and environmental geosciences from internationally well recognized scientists?
- Benefit from career coaching and early international networking?
- Live in Vienna, a city that is continuously ranked among the top cities in the world for quality of life?

Regardless whether you are interested to study molecular and biochemical mechanisms, single cells, microbial communities or ecosystems and biochemical processes, our faculty provides the ideal framework for your PhD project with the combined expertise of 18 researchers at the assistant, associate and full professor level.

We are looking forward to receiving convincing applications of dedicated and enthusiastic students! For details about the application procedure, please visit <https://vds-mes.univie.ac.at/apply> or contact [vds-mes.cmess@univie.ac.at](mailto:vds-mes.cmess@univie.ac.at).

The **deadline** for this call is **September 30, 2020**.
